ABOUT COMPANY

Cellsol Energy was established in 2007 and has been catering to the ever-increasing and changing telecommunications industry. With the earliest projects involving BTS radio, 2G swaps, decentralized networking, and smart solutions.

In 2021 Cellsol Energy expanded its operations to providing energy solutions and components to residential and commercial users and quickly became the fastest growing solar company in Pakistan.

Our recent successful ventures have been to provide complete energy solutions to the **agricultural, commercial and industrial sectors**. With our head office based in Lahore, Cellsol is operating in all major cities of Pakistan, providing solar solutions, solar products including solar panels in Lahore, Multan, Faisalabad, Islamabad, Peshawar & Karachi.

Our other ventures include vertical transportation systems, Surveillance Systems, Networking, AI and Smart automation. We provide the best solar systems in Lahore and are committed to providing our customers with excellent solar services in Pakistan. Cellsol is certified by **Pakistan Engineering Council (PEC)** and authorized by the **National Electric Power Regulation Authority (NEPRA) & Alternative Energy Development Board (AEDB)** for the installation of renewable energy systems enabled with net metering in Pakistan.

SINCE 2007

DIRECTOR BD MESSAGE

MR FRAAZ AFTAB

Greetings,

At **Cellsol Energy**, we're dedicated to pioneering solar solutions that power a sustainable future. Our commitment to innovation and efficiency drives us as we install cutting-edge solar technology worldwide.

Join us in illuminating a cleaner, greener world.

Best regards,
Fraaz Aftab

**One of the Pioneer PV Solar Energy
Solution providers in Pakistan**

OUR PHILOSOPHY

Cellsol Energy puts safety first. We ensure a secure workplace and prioritize customer safety. Our top-notch solar products meet stringent safety, health, and environmental standards.

Adhering to government regulations is mandatory for all, contractors included. Additionally, our team educates customers on safety protocols relevant to the installed technology.

Our dedication goes beyond exceptional solar solutions; it encompasses a commitment to the well-being of our workforce, clients, and communities through stringent safety measures and unwavering compliance.

OUR MISSION

**Synergizing energy
and communication
with smart
automation
in Pakistan.**

OUR VISION

Cellsol's guideline is to expand in the energy and communication sector by focusing on:

Using technology to make everyday life comfortable and affordable.

Cost-effective electricity.

Uninterrupted and constant power supply.

Smart automation to save energy.

Green and clean energy.

OUR SERVICES

Solar power plant design, commissioning and operations (Off-grid, on-grid and grid tie solar power plants)

Electrical & Mechanical Engineering, procurement and commissioning

Round the clock operations hotline.

Networking, smart connect and telecommunication solutions.

OUR CORE VALUES

Cellsol's guideline is to expand in the energy and communication sector by focusing on:

01

Using technology to make everyday life comfortable and affordable.

02

Innovative and state-of-the-art smart communications network

03

Uninterrupted and constant power supply.

04

Smart automation to save energy.

05

Cost-effective electricity.

06

Green and clean energy

CLEAN, SAFE RENEWABLE

CORPORATE SOCIAL RESPONSIBILITY

At **Cellsol Energy** we believe in giving back and improving the state of the community that we live in.

To that end, the company is running a **school for girls** in the rural area of **Kasur (Sutlej Model School)**.

We are also a part of and support different programs organized by the **Hum Mashal-e-Rah Foundation** in catering to the needs and integration in society of children and adults with special needs.

Cellsol conducts yearly **tree planting** initiatives as a cornerstone of its vision toward a more eco-friendly and pristine Pakistan.

CORPORATE EVENTS

Cellsol Energy is Pakistan's leading solar installation company actively engaged in sponsoring and attending corporate events nationwide. Our commitment to revolutionizing clean energy drives us to advocate for sustainable practices within businesses and communities. Join us in shaping a greener, more sustainable future.

Our Team

Our core team is continuously **trained** and **updated** for both installation and designing.

Installation of state-of-the-art **energy** and **communication** technologies for all **residential, agricultural, commercial and industrial** usage. We aim to provide our customers with the **best in services**.
